Examiner's Amendment/Reasons for Allowance

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the Claims

2. Amend claims 14-16 as follows:

Delete limitations of claim 14 and insert: --The method of claim 12 further comprising displaying one or more nodes of at least one path in said decision network resulting in a correct interpretation of a data item.--

Delete limitations of claim 15 and insert: --The method of claim 14, wherein displaying one or more nodes of at least one path in said decision network results in an incorrect interpretation of said data item.--

Delete limitations of claim 16 and insert: --The method of claim 14, wherein said decision network is a decision tree model.--

Authorization for this examiner's amendment was given in a telephone interview with Richard A. Hinson, attorney for applicant, on January 3, 2005.

Reasons for Allowance

3. Claims 1-29 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention, prior to the related affidavit certification date of April 13, 2000, of using a quality measure at a node in an established path functioning on a substitute query where such quality measure establishes improved performance and such related section of the decision network is regrown from the respective node down through the related leaves.

The closest prior art (Gentili, IEEE 0-7803-6725-1/01) teaches that it is not necessary that the patterns containing new information influence the whole tree, proposed algorithms determine new branches from some patterns of the new training set and attaches them in the right position on the old decision tree. Such results were published by the Gentili on October 10, 2001, subsequent to the affidavit certification date of April 13, 2000. The applicant's invention provides a look ahead to the utility of a query prior to the iteration within the decision network of such query.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
